Software Engineer with more than three years of experience in helping companies build quality Web applications and Write Reusable and Maintainable code. Eager to solve challenging problems and always up for learning new things.

EXPERIENCE

ENGINEER - SOFTWARE DEVELOPMENT

3i Infotech | June 2023 - Present

- I am accountable for constructing the user interface of a product designed for utilization by C-level employees to effectively oversee their subordinates, utilizing technologies such as ReactJS, CSS, and Ant Design
- This position entails the primary responsibility of spearheading the development of a product from its conceptualization to its full realization, employing an extensive skillset in React JS, CSS, and Ant Design (AntD).
- Collaborating closely with backend engineers to facilitate seamless API integration.

SOFTWARE ENGINEER

Doodleblue Innovations | Nov 2021 - May 2023

- Owned and converted product specs into reliable frontend engineering solutions for multiple service-based products & projects.
- Responsible for integrating a large set of APIs with the User Interface by understanding complex logic & data.
- Responsible for performing Peer Code Review.
- Managed teams to meet the deliverables on time.

FRONT-END DEVELOPER

Spritle Software | Aug 2020 - Nov 2021

- Front-end developer for multiple ReactJS projects.
- Responsible for building Features, Code optimizations, and Performance enhancements.
- Integrated Firebase to the applications to access its features like Authentication, Firestore, and Hosting.
- Experience as a Ruby on Rails Developer, writing maintainable code, collaborating effectively with teams, and delivering high-quality web applications.

FRONT-END DEVELOPER INTERN

Skript Technologies Pvt. Ltd. | Nov 2019 - Dec 2019

- Part of the development team where I used ReactJS to implement new features in one of their projects.

SKILLS

PROGRAMMING LANGUAGES
